

bivitec x 3

The brilliantly simple design of Binder+Co's BIVITEC makes it possible to classify material difficult to screen on three decks.

- Especially suitable for difficult screening tasks in all weather conditions
- Prevention of oversized particles by means of oxhorn system
- Only one drive mechanism
- Grain sizes from 0.2 mm to 150 mm
- Vibration parameters are individually adjustable for each screening deck
- Simple change of mats and thus high availability
- Low energy and maintenance costs, short amortisation times

- Processing Technology
- Environmental Technology
- Bagging Technology
